## SECTION 7: Handling and storage

### **Precautions for safe handling**

Handling in a well ventilated place. Wear suitable protective clothing. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Use non-sparking tools. Prevent fire caused by electrostatic discharge steam.

### **Conditions for safe storage, including any incompatibilities**

Store the container tightly closed in a dry, cool and well-ventilated place. Store apart from foodstuff containers or incompatible materials.

## **SECTION 12: Ecological information**

## Toxicity

Toxicity to fish: no data available

Toxicity to daphnia and other aquatic invertebrates: no data available

Toxicity to algae: no data available

Toxicity to microorganisms: no data available

## Persistence and degradability

no data available

## Bioaccumulative potential

Based upon the rapid hydrolysis of the structurally similar benzyl chloride in aqueous environments(1), bioconcentration of dichlorobenzyl chloride in aquatic organisms is not expected to be an important fate process(SRC).

## Mobility in soil

Using a structure estimation method based on molecular connectivity indices(1), the Koc for dichlorobenzyl chloride can be estimated to be about 1,400(SRC). According to a classification scheme(2), this estimated Koc value suggests that dichlorobenzyl chloride is expected to have low mobility in soil(SRC). Hydrolysis of dichlorobenzyl chloride is expected in moist soils(SRC), based upon a reported hydrolysis half-life of 15 hours for the structural analog benzyl chloride(3).

## Other adverse effects

no data available

---

## SECTION 13: Disposal considerations

### Disposal methods

#### Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

#### Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
