Other Information

Technical dinonyl phenol is a mixture of various isomers and may contain up to 15% nonyl phenol. The CAS number of 2,4-dinonyl phenol is 137-99-5. The substance is combustible but no flash point is available in literature. The symptoms of lung oedema often do not become manifest until a few hours have passed and they are aggravated by physical effort. Rest and medical observation are therefore essential.
